

Dipperfox The ultimate stump removal tool

SC400

Designed to be used in populated places (gardens, public parks and urban areas etc)

Multi-carrier tool, to be used with mini excavators, small loaders and "Stand On" Utility Track Loader

Lightweight (less than 200kg) but extremely powerful (13,7kN)

Allows remove stumps with limited access (next to buildings or surrounded with tarmac or stones)

SC600

Multi-carrier tool - which can be used with skid steer, backhoe, loader, excavator or even harvester. (From 2200 PSI & 17gpm/150 bar & 65 lpm)

SC600 can operate up to 0,7m/27" below the ground to crush the roots, which can't be done with traditional grinders

SC850 Pro

The most efficient stump removal tool for excavators
10 times faster than other known stump removal methods

SC850Pro can operate up to 0,9m/35" below the ground to crush the roots, which can't be done with traditional grinders

No waste left behind (grinded stump will be used as fertilizer for the ground)

Suitable for excavators between 13 to 30 tons

With great flexibility in hydraulic requirements in both flow (29-58 gpm) and operating pressure (2610-5076 PSI)

Dipperfox operates in low RPM, providing the following benefits:

- 1) It is much safer BUT also much faster, compared with traditional grinders
- 2) It doesn't need huge safety zone, as there is no fast moving blades to spread around the debris
- 3) No aggressive contact with the rocks on the ground (If the blade hits the rock, it will simply be pushed away)
- 4) All the debris will stay next to the drilling position, no flying safety hazards!
- 5) Reduced noise pollution, compared with grinders – great tool for urban environment

Automatic speed/torque adjustment (built-in long lasting 2-speed planetary gearbox)

No electronics, i.e. no cables (fully hydraulic operation)

Unit can be stored in outside conditions (no sensitive electronics, no corrosion on contacts)

All Dipperfoxes are have bolt-on blades which makes the maintenance procedure easy.

Easy to maintain - long oil change intervals (250 hours). Very user-friendly

Light weight (320kg/ 705 lb) allows Dipperfox SC600 to be transported with pick-up truck or trailer

Unique in its class – patented technology

Developed and engineered by an excavator entrepreneur, who has 20+ years of experience in excavator fleet management
