## ■ Greentec JAGUAR 40 THREEPOINT LINKAGE

- The massive 600mm wide heavy-duty drum with 20mm wall, produces uniform wood chips from either heavy logs or branches.
- An optional infeed table makes chipping of brush and foliage very easy and efficient
- A simple and logical user interface maximises output and performance and minimises maintenance costs
- All wear parts are easily replaced minimising downtime.
- Quick change knives are fitted as standard

Quick change knives are fitted as standard

Chip size is controlled by a very easily accessible and changeable grate

The large 450mm diameter top feedroller is very aggressive and powerful

Option: Closed infeedchain covering complete width of the infeedtable
