

OUR SHREDDERS OF THE ARJES INTERMEDIATE CLASS

PRODUCT LINE **EKOMAXX**

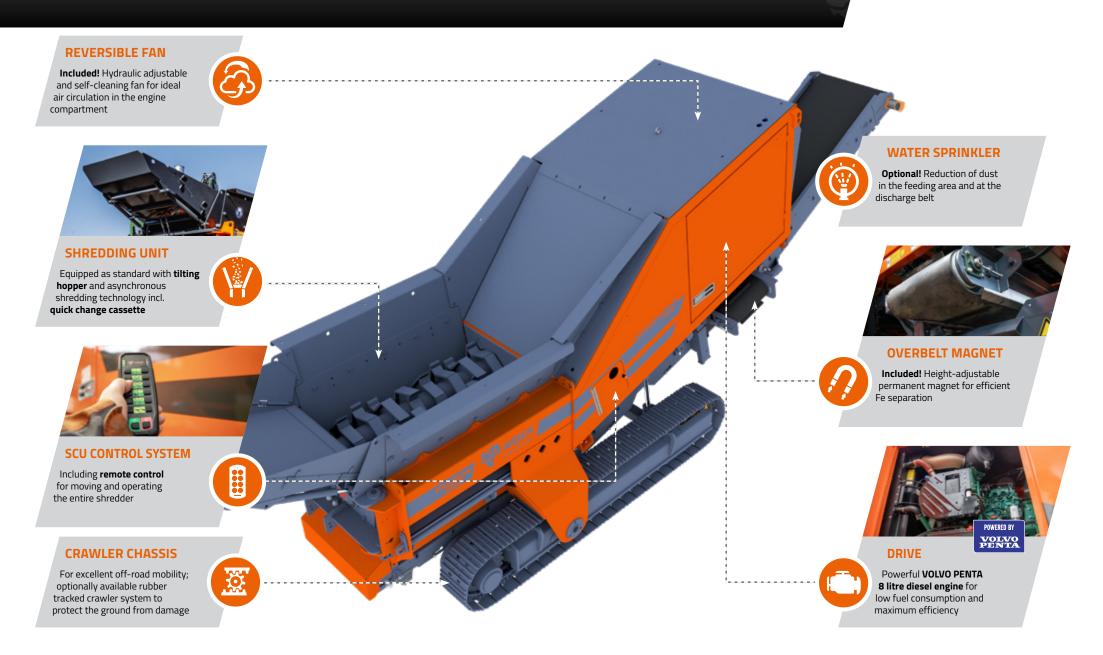

In the intermediate class, the concept of economic sustainability is at the forefront of machine development. ARJES' goal is clearly defined: "Optimum cost-benefit ratio for the maximum benefit of our customers and users". These are mainly to be found in composting and wood processing companies as well as in the processing of domestic and commercial waste. The mobile shredder offers advantages that are a part of the standard ARJES design. These include the crawler track system, the revolutionary shaft quick change system, an innovative SCU control system and a paddle shaft design that guarantee the customer long service life and durability.

For all customers with special requirements regarding exhaust and noise emissions, the stationary electric version of the EKOMAXX class is the right solution. Our machines with electric power unit are particularly energy-saving and efficient for the user, as they can be used for shredding the most difficult materials with significantly less maintenance.

The main areas of application are in the treatment of green waste, waste wood and roots, as well as in the processing of household, commercial and bulky waste. The shredding of old tires, paper and cardboard is also possible without any problems with our intermediate class.

EKOMAXX 800 MOBILE INTERMEDIATE CLASS

TECHNICAL DATA

DIMENSIONS	
Version	Crawler track system
Length (mm)	9,900 / 8,100 (transport)
Width (mm)	2,450 / 2,450 (transport)
Height (mm)	4,000 / 3,100 (transport)
Total weight (kg)	21,000

DRIVE	EU / US	ROW**
Engine (Volvo Penta)	TAD 883 VE	TAD 853 VE
Emission standard	EU Stage V / EPA Tier IV	Stage III A
Power (kW / HP)	235/320	
Fuel capacity (I)	400	
Gearbox	Bonfiglioli	

DISCHARGE BELT	
Discharge height (mm)	3,300
Width (mm)	1,000
Included	Overbelt magnet

SHREDDING UNIT	
Hopper volume (m³)	4.50 (incl. tilting hopper)
Shaft length (mm)	2,000
Shaft diameter (mm)	680
Weight (kg / cassette)	3,500
Rotation speed (rpm)	42

Mechanically adjustable side combs

To change the requested output grain size, the side-arranged combs can be opened or closed in full. Thus the throughput can be adjusted in accordance with the type of material and the customer's requirements.

Quick change system for tool shafts

Increase operational efficiency through quick and easy shaft changes and make maintenance and reprocessing of worn shredding shafts easier.

Hydraulically adjustable tilting hopper as standard

For loading via wheel loader with a shovel width of up to 3.60 m, the shredding unit is standard equipped with a tilting hopper that is adjustable up to 180°.

EKOMAXX 800 STATIONARY INTERMEDIATE CLASS

CONTROL SYSTEM Direct operation via remote **control**; optional integration into complete systems according to customer requirements **SHREDDING UNIT** Equipped as standard with large-volume tilting hopper; optimal loading via wheel loader, shovel width up to 4.60 m

DISCHARGE BELT

Optional! 1,000 mm wide and 7,000 mm long discharge belt for optimum material discharge

OVERBELT MAGNET

Optional! Height-adjustable permanent magnet for effective Fe separation

DRIVE

Powerful **electric motor** performs with high efficiency and low energy costs

STATIONARY

Used as an invidual machine or optional integration in recycling plants according to customer requirements

TECHNICAL DATA

DIMENSIONS	
Version	Stationary
Shredding Unit	
Length (mm)	5,300 / 11,100 (incl. discharge belt)
Width (mm)	2,300
Height (mm)	3,000 / 4,300 (incl. discharge belt)
Control Unit	
Length (mm)	2,700
Width (mm)	1,600
Height (mm)	2,700
Total weight (kg)	16,000 (shredding unit with discharge belt) 4,500 (power unit)
DRIVE	
Engine	Electric
Power (kW)	250
Gearbox	Bonfiglioli
SHREDDING UNIT	
Hopper volume (m³)	4.00
Shaft length (mm)	2,000
Shaft diameter (mm)	680
Weight (kg / cassette)	3,500
Rotation speed (rpm)	42

Separate drive and control unit

Due to separate placement of the shredding and control unit (max 6 meters in between) there is significant less vibration to the control system. Additionally, dust and dirt are reduced.

Quick change system for tool shafts

Effortless change of shredding shafts without time-consuming disassembly or assembly is a major advantage to increase the efficiency of your ARJES shredder significantly.

Mechanically adjustable side combs

The design of the combs allows fully opening or closing, so in dependence on the material and the customer's requirements, the throughput of the shredder can be adjusted.

CONVINCING ARGUMENTS FOR OUR INTERMEDIATE CLASS

- **Best price-performance ratio in its class** incl. standard attachments* (e.g. reversible fan, magnet etc.)
- 2 Largest range of applications
 Processing of many types of material with the thoughest requirements
 (such as commercial waste, natural and waste wood, old tires, etc.)
- Revolutionary shaft quick change system

 Shortens maintenance times, refurbishment and changing different shaft types for almost uninterrupted operation
- 4 Hydraulically adjustable tilting hopper
 Higher loading capacity and operability when loading the shredder
- Innovative SCU plug and play control

 Predefined shredding programs that control rotation and speed of shafts for user-friendly operability

*only available for mobile machines
