

BROWN LENOX & CO. LIMITED

MOBILE CRUSHING UNIT *75s – HYDRAULIC*

FEATURES

- ★ Large capacity feed hopper with heavy duty grizzly feeder.
- ★ Well proven Brown Lenox heavy duty double toggle jaw crusher.
- ★ Wide discharge conveyor with heavy duty impact section.
- ★ Well proven diesel/hydraulic power unit.
- ★ Completely self contained mobile crushing unit with quick set-up time features.

FEED HOPPER

This is constructed of steel plate and rolled steel sections to form a heavy duty structure with large capacity, with fitted wear liners as standard feature.

FEEDER

This is a heavy duty grizzly type vibrating feeder with a grizzly deck with a step deck design and incorporating variable speed.

JAW CRUSHER

Heavy duty double toggle jaw crusher suitable for quarry and recycling applications. The machine is constructed of high grade steel castings and steel plate fabricated to make a robust heavy duty unit. The unit features hydraulic adjustment to ease changes of crusher closed side setting.

MAIN DISCHARGE CONVEYOR

This incorporates a wide belt with heavy duty impact idlers and lagged head drum and open spiral type tail drum. A belt scraper is provided and the power is provided by a hydraulic motor.

POWER UNIT

The power unit is a diesel engine combined with a hydraulic tandem pump package fitted to form an integral self sufficient power supply for the whole operation of the crushing unit.
